The Trust recognises that by efficiently managing its records, it will be able to comply with its legal and regulatory obligations and to contribute to the effective overall management of the organisation.

The policy will be reviewed every three years, and after major organisational or technological changes.

1. Scope of the policy

This policy applies to all records created, received or maintained by staff of the Trust in the course of carrying out its functions.

Records are defined as all those documents which facilitate the business carried out by the Trust and which are thereafter retained (for a set period) to provide evidence of its transactions or activities. These guidelines apply to information created and stored in both physical (hard copy) and electronic format.

Individual staff and employees must ensure that records for which they are responsible are accurate, and are maintained and disposed of in accordance with this policy.

2. Student Records

The student record should be seen as the core record charting an individual student's progress through the Education System. The student record should accompany the student to every school they attend and should contain information that is accurate, objective and easy to access. These guidelines are based on the assumption that the student record is a principal record and that all information relating to the student will be found in the file (although it may spread across more than one file cover).

For secondary schools the following items should be included on the student record (either paper or digitally):

- Information from previous schools
- Admission form (application form)
- Privacy Notice (if these are issued annually only the most recent need be on the file)
- Parental and student consents
- Any Written letters or reports to Parents
- Any information relating to a major incident involving the child (either an accident or other incident)
- Any reports written about the child
- Any information about an EHCP and support offered in relation to the EHCP.
- Any relevant medical information
- Child protection reports/disclosures (should be stored in the file in a sealed envelope clearly marked as such or in a separate file)
- Any information relating to exclusions (fixed or permanent)
- Any correspondence with parents or outside agencies relating to major issues
- Details of any complaints made by the parents or the student

The following records should be stored separately to the student record as they are subject to shorter retention periods.

- Absence notes
- Parental consent forms for trips/outings (In the event of a major incident all the parental consent forms should be retained with the incident report not in the student record)
- Correspondence with parents about minor issues
- Accident forms (these should be stored separately and retained on the school premises until their statutory retention period is reached. A copy could be placed on the student file in the event of a major incident)

3. Responsibility for the student record once the student leaves the school

The school which the student attended until statutory school leaving age is responsible for retaining the student record until the student reaches the age of 25 years. After this time the student record should be disposed of in accordance with the safe disposal of records guidelines.

4. Storage of student records

All student records should be kept securely at all times. Paper records, for example, should be kept in lockable storage areas with restricted access, and the contents should be secure within the file. Equally, electronic records should have appropriate security.

Access arrangements for student records should ensure that confidentiality is maintained whilst equally enabling information to be shared lawfully and appropriately, and to be accessible for those authorised to see it.

5. Good Practice for Managing E-mail

E-mail is not always a secure medium to send confidential information.

- **It is secure** if you email within the trust office 365 email for example *.tmet.org.uk (e.g. from @wvc.tmet.org.uk to @ivc.tmet.org.uk)
- **It is not secure** if you email from a 'tmet' address to an email address outside of 'tmet' for example our colleagues at County
- **It is secure** if you email within the @impington.org.uk address space (e.g. from @impington.org.uk to @impington.org.uk)

You need to think about information security when you send confidential information by e-mail to reduce the risk of a data breach. If you are sending confidential or sensitive information that is **NOT** on a secure link then it must be sent by a secure encrypted e-mail system with password protection on the email. It is recommended that you do not put personal information (such as a student's name) in the subject line of an e-mail.

If you are sending emails that contain personal or sensitive data ensure that you always respond to an authorised and approved address. All emails that are used for official business must be sent from an official business domain address.

E-mail is disclosable under Freedom of Information and Data Protection legislation. Be aware that anything you write in an email could potentially be made public. Emails can remain in a system for a period of time after you have deleted them. The Trust has a seven year retention period for any email that has been deleted. You must remember that although you may have deleted your copy of the e-mail, the recipients may not and therefore there will still be copies in existence. These copies could be disclosable under the Freedom of Information Act 2000 or under the Data Protection Act 2018.

The retention period for keeping e-mails should correspond with retention periods set out in the tables below. The e-mails may need to be saved into any appropriate electronic filing system or printed out and placed on paper files.

6. Disposal of records

Managers must ensure that records that are no longer required for business use are reviewed as soon as possible under the criteria set out so that only the appropriate records are destroyed. This will determine whether records are to be selected for permanent preservation, destroyed, digitised to an electronic format or retained by the Trust for research or litigation purposes. Whatever decisions are made they need to be documented as part of the records management policy.

All records containing personal information, or sensitive policy information that require disposal should be made either unreadable or un-reconstructable.

- Paper records should be shredded using a cross-cutting shredder
- DVDs etc. should be cut into pieces
- Hard Disks should be dismantled

Any other paper records should be bundled up and disposed of to a waste paper merchant or disposed of in other appropriate ways. Do not put records in with the regular waste. Where an external provider is used it is recommended that all records are shredded on-site in the presence of an employee. The organisation must also be able to prove that the records have been destroyed by the company who should provide a Certificate of Destruction. Staff working for the external provider should have been trained in the handling of confidential documents. Before signing contracts for this work a check will need to be made about their compliance under the General Data Protection Regulation 2016 (GDPR).

Under the Freedom of Information Act and the GDPR it is important to understand that if the records are recorded as to be destroyed but have not yet been destroyed and a request for the records has been received they MUST still be provided.

Where records are destroyed internally, a Senior Manager must authorise the destruction of the records and this destruction recorded. Records should be shredded as soon as the record has been documented as being destroyed.

The Freedom of Information Act 2000 and the GDPR require that the Trust maintains a list of records which have been destroyed and who authorised their destruction.

Members of staff should record at least:

- File reference (or other unique identifier);
- File title (or brief description);
- Number of files and date range
- The name of the authorising officer
- Date action taken

This information should be sent to the Trust's DPO for the central record.

7. Retention Guidelines

Under the Freedom of Information Act 2000, schools are required to maintain a retention schedule which lays down the length of time which the record needs to be retained and the action which should be taken when it is of no further administrative use.

Members of staff are expected to manage their current record keeping systems using the retention schedule and to take account of the different kinds of retention periods when they are creating new record keeping systems.

There are a number of benefits which arise from the use of a complete retention schedule:

- Managing records against the retention schedule is deemed to be "normal processing" under the Data Protection Act 2018, General Data Protection Regulation 2016 and the Freedom of Information Act 2000. Members of staff should be aware that once a Freedom of Information (or Subject Access) request is received or a legal hold imposed then records disposal relating to the request or legal hold must be stopped
- Members of staff can be confident about safe disposal information at the appropriate time.
- Information which is subject to Freedom of Information and Data Protection legislation will be available when required. The school is not maintaining and storing information unnecessarily.

The following retention schedule contains recommended retention periods and refers to all information regardless of the media in which it is stored. If record series are to be kept for longer or shorter periods than laid out in this document, the reasons for this need to be documented.
